

PROFILE SUMMARY

Cloud & DevOps Engineer with hands-on experience in infrastructure automation, Windows & Linux Servers, Azure infrastructure provisioning. Proficient in Terraform, Ansible, Kubernetes, and Azure DevOps.

EDUCATION

B.Sc. in Information Technology Management | Ravenshaw University | 2020 – 2023

SKILLS

Technical Skills: Cloud Computing (Azure), Virtualization (Hyper-V, VMware vSphere), CI/CD (Azure DevOps) Infrastructure as Code (Terraform), Configuration Management (Ansible), Containerization (Docker, Kubernetes), Server Administration (Linux, Windows Server), Scripting (Python, Bash, PowerShell), Networking, Observability (Prometheus, Grafana, EFK Stack), Version Control (Git)

EXPERIENCE

Accenture — Kolkata

Server Admin & Cloud Engineer | June 2023 – Present

Key Responsibilities:

- Manage a hybrid infrastructure of 7,500+ Windows and Linux servers.
- Ensure operational continuity through patching, upgrades, virtualization management (VMware vCenter, Hyper-V), and high availability setup.
- Perform server upgrades, provisioning, and decommissioning activities.
- Manage and administer the Microsoft Azure cloud environment, including provisioning, configuration, performance monitoring, policy governance and security.
- Work on migration of existing on-premises infrastructure to Microsoft Azure.
- Follow ITSM best practices for incident management and change requests.
- Contribute to shift rotations and on-call support to maintain 24/7 system availability.

PROJECTS

Cloud-Native Shopping Site Infrastructure on AKS

Tools: Terraform, Kubernetes, Azure AKS, Azure DevOps, Helm, Prometheus, Grafana

Highlights: Provisioned AKS infrastructure using Terraform modules and deployed a multi-tier microservices shopping website. Automated CI/CD pipelines in Azure DevOps for Infrastructure Provisioning, Infrastructure Decommissioning, container build, push to Azure Container Registry, and Kubernetes deployment. Integrated monitoring by deploying Prometheus & Grafana via Helm. Implemented secure authentication with Azure Key Vault and Service Principals, maintaining a modular, reusable infrastructure-as-code setup.

Mail-Alerting System for Azure VMs

Tools: Terraform, Azure, Ansible

Highlights: Automated provisioning of Azure VMs with Terraform and implemented Ansible-based monitoring to collect system metrics. Generated animated HTML reports using Jinja2 templates and delivered them via email using SMTP, enabling proactive infrastructure health tracking.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- HashiCorp Certified: Terraform Associate — 2024
